

## Point Loma Nazarene University

### **EGR 432-01: Computer Interfacing      2.0 units      Course Syllabus, Spring 2017**

---

Instructor: Christopher T. Gabler  
E-mail: [cgabler@pointloma.edu](mailto:cgabler@pointloma.edu)  
Office: Rohr Science 209  
Office hours: T 2:30 – 3:30, W 3:00 – 4:00, R 11:00 – 12:00,  
and by appointment  
Phone: 619-849-2356      Cell: 858-354-8762  
Class Meeting Time: (RS 219) 1:30 – 2:35, Lab 2:45-4:35 p.m. RS-219

---

### **PLNU Mission** **To Teach ~ To Shape ~ To Send**

#### **University Mission:**

Point Loma Nazarene University exists to provide higher education in a vital Christian community where minds are engaged and challenged, character is modeled and formed, and service becomes an expression of faith. Being of Wesleyan heritage, we aspire to be a learning community where grace is foundational, truth is pursued, and holiness is a way of life.

**Department Mission:** The Physics and Engineering Department at PLNU provides strong programs of study in the fields of Physics and Engineering. Our students are well prepared for graduate studies and careers in scientific and engineering fields. We emphasize a collaborative learning environment which allows students to thrive academically, build personal confidence, and develop interpersonal skills. We provide a Christian environment for students to learn values and judgment, and pursue integration of modern scientific knowledge and Christian faith.

**Materials - Main text:** Introduction to Autonomous Mobile Robots ISBN 978-0-262-01535-6, Siegwart, S., Nourbakhsh, I., Scaramuzza, D., MIT Press, 2011, 2<sup>nd</sup> edition.

*Supplemental text:* Practical Electronics for Inventors, by Scherz, P., and Monk, S., McGraw Hill, 2013, 3rd Edition, ISBN 978-0-07-177133-7

**Prerequisites or Co-requisites - Prerequisite(s):** EGR 422 Digital Electronics.

#### **Canvas:**

The online resource Canvas is integral for this course, and you are expected to login regularly. You need a reliable internet connection to be able to use this resource.

**Disclaimer: The content of this syllabus and/or course outline may change during this semester.**

## **Course Description**

The course of EGR 432 Computer Interfacing is the design, analysis, and implementation of digital controls systems using microcomputers and microcontrollers. Special attention given to the interfacing of hardware and digital devices to processors and controllers. Three lectures and one laboratory each week. (Quad I course)

**Course Learning Outcomes** - The objectives of the course are to:

1. Understand the concepts of automation, robotics, mechatronics and autonomous robotics.
2. Understand the details on locomotion of robotic devices, sensing, spatial mapping, and path generation.
3. Learn the use and functions of microcontrollers in outside world sensing, global mapping and path generation, mobile commands and execution.
4. Understand and apply programming scripts to integrate control commands to a microcontroller.
5. Design and analyze programs that interact and interface with controllers and processors.

**Attendance:** Attendance is expected at each class session. In the event of an absence you are responsible for the material covered in class and the assignments given that day. Regular and punctual attendance at all classes is considered essential to optimum academic achievement. If the student is absent from more than 10 percent of class meetings, the faculty member can file a written report which may result in de-enrollment.

**Disclaimer:** The content of this syllabus and/or course outline may change during this semester.

**Attendance:**

If the absences exceed 20 percent, the student may be de-enrolled without notice until the university drop date or, after that date, receive the appropriate grade for their work and participation. See

<http://catalog.pointloma.edu/content.php?catoid=24&navoid=1581#Class Attendance> in the Undergraduate Academic Catalog.

**Credit Hour:** In the interest of providing sufficient time to accomplish the stated course learning outcomes, this class meets the PLNU credit hour policy for a 2 unit class delivered over 8 weeks. Specific details about how the class meets the credit hour requirements can be provided upon request.

**Class Enrollment:** It is the student's responsibility to maintain his/her class schedule. Should the need arise to drop this course (personal emergencies, poor performance, etc.), the student has the responsibility to follow through (provided the drop date meets the stated calendar deadline established by the university), not the instructor. Simply ceasing to attend this course or failing to follow through to arrange for a change of registration (drop/add) may easily result in a grade of F on the official transcript.

**Class Meetings** – Studying analog electronics requires active learning and participation during class. In preparation for each class meeting there is a reading assignment. To maximize your learning and participation during our meetings it is very important that you have read this material before class.

**Class Conduct** – Attendance and punctuality are requirements for the course to help the student maximize his overall learning experience. Class exercises, questions and other elements of participation are factors in the students' overall grade assessment. The student is accountable for *all material* covered in class. In addition, students need to respect the classroom environment, and activity such as cell phone use, talking during the class lecture portions (when not engaged in questions and answers) and/or any other related behavior that interferes with the learning experience will be addressed to the student by the instructor.

**Technology, devices and classroom participation:** For my lecture classes, use of computers such as notebooks, iPad and similar devices shall be used just for class activities, PowerPoint, etc. Use of extra-curricular apps such as texting and social media needs to be controlled or closed such that it does not disrupt or distract the classroom environment, classmates or the instructor. Please be professional and courteous in this area of your use of technology in the classroom.

**Disclaimer:** The content of this syllabus and/or course outline may change during this semester.

**Course Objectives** – An emphasis is placed on both conceptual understanding and the ability to solve problems dealing with the concepts studied

- (a) an ability to apply knowledge of mathematics, science, and engineering
- (b) an ability to design a system, component, or process to meet desired needs
- (c) an ability to identify, formulate, and solve engineering problems
- (d) a recognition of the need for, and an ability to engage in life-long learning
- (e) an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- (f) an ability to apply principles of engineering, basic science, and math to model, analyze, design and realize physical systems, components or processes

**Homework** – Homework is worth 10% of your final grade.

*Submission:* Written homework solutions should be worked neatly in clear logical steps. (Solutions and explanations should be clear enough that one of your peers could easily follow what you did if they had not worked the problem before.)

*Collaboration:* We expect and encourage collaboration between you and your peers while working on your homework, but your work should be your own original solutions. Allow adequate time to work and think about problems by yourself first before you work together with your peers or ask questions of me. When you sit down to write up a problem, you should not use notes copied from someone else. The guideline is that you should have no trouble explaining or repeating work that you turn in.

**Late Work:** I generally do not accept late work unless there is a documented emergency. If late work is submitted, the following applies:

*Late Submission:* Up to one late assignment per quad will be accepted late with a 10% reduction in grade for every day it is late. This begins with a 10% reduction for an assignment turned in later in the day after this homework has been collected at the beginning of class.

**Lab** – You will participate in a lab designed to give you hands-on experience with the concepts covered in the class meetings. Lab will also provide an opportunity for you to use computers, software and hardware to perform measurements, and analyze data using the scientific method. Labs will be completed in small groups, with each member of the team completing his or her own worksheet. Labs comprise 20% of your final grade. You must pass the lab portion of the class to pass the course.

**Disclaimer:** The content of this syllabus and/or course outline may change during this semester.

**Exams** – Examinations will be given in class, which count toward 40% of your final grade, consisting of two midterms. The class project/presentation counts for 15% of your grade. Details about the class project/presentation will be added in the lecture class. Exams will be closed book. Partial credit will be given for correct reasoning at any step of the problem, but only if it is communicated clearly enough for me to understand. For problems that call for a solution or explanation, no credit will be given for an answer alone; the method or reasoning must also be shown.

**Policy for missed exams:** Unless you have express written permission from me long before the date of the exam to take the exam on another day, there will be no makeup exams for this course

**Final Grades** – The grade you earn in this course is roughly based on the following scale: 100%-88% A, 88%-85.5% A-, 85.5%-83% B+, 83%-78% B, 78%-75.5% B-, 75.5%-73% C+, 73%-68% C, 68%-65.5% C-, 65.5%-63% D+, 63%-58% D, 58%-55.5% D-. The points you receive during the course are weighted accordingly: in-class quizzes: 15%, homework: 10%, labs: 20%, exams (2): 40%, class presentation 15%.

**Final Exam:** The final exam date and time is set by the university at the beginning of the semester and may not be changed by the instructor. This schedule can be found on the university website and in the course calendar. No requests for early examinations will be approved. Only in the case that a student is required to take three exams during the same day of finals week, is an instructor authorized to consider changing the exam date and time for that particular student.

### **PLNU ACADEMIC HONESTY POLICY**

---

Students should demonstrate academic honesty by doing original work and by giving appropriate credit to the ideas of others. Academic dishonesty is the act of presenting information, ideas, and/or concepts as one's own when in reality they are the results of another person's creativity and effort. A faculty member who believes a situation involving academic dishonesty has been detected may assign a failing grade for that assignment or examination, or, depending on the seriousness of the offense, for the course. Faculty should follow and students may appeal using the procedure in the university Catalog. See [Academic Policies](#) for definitions of kinds of academic dishonesty and for further policy information.

### **PLNU ACADEMIC ACCOMMODATIONS POLICY**

---

If you have a diagnosed disability, please contact PLNU's Disability Resource Center (DRC) within the first two weeks of class to demonstrate need and to register for accommodation by phone at 619-849-2486 or by e-mail at [DRC@pointloma.edu](mailto:DRC@pointloma.edu). See [Disability Resource Center](#) for additional information.

For more details see the PLNU catalog:

[http://catalog.pointloma.edu/content.php?catoid=24&navoid=1581#Academic Accommodations](http://catalog.pointloma.edu/content.php?catoid=24&navoid=1581#Academic%20Accommodations)

Students with learning disabilities who may need accommodations should discuss options with the instructor during the first two weeks of class.

**Disclaimer: The content of this syllabus and/or course outline may change during this semester.**

### **PLNU COPYRIGHT PROTECTED MATERIALS POLICY**

---

Point Loma Nazarene University, as a non-profit educational institution, is entitled by law to use materials protected by the US Copyright Act for classroom education. Any use of those materials outside the class may violate the law.

### **FERPA POLICY**

---

In compliance with federal law, neither PLNU student ID nor social security number should be used in publicly posted grades or returned sets of assignments without student written permission. This class will meet the federal requirements by (Note: each faculty member should choose one strategy to use: distributing all grades and papers individually; requesting and filing written student permission; or assigning each student a unique class ID number not identifiable on the alphabetic roster.). Also in compliance with FERPA, you will be the only person given information about your progress in this class unless you have designated others to receive it in the "Information Release" section of the student portal. See Policy Statements in the (undergrad/ graduate as appropriate) academic catalog.

**Questions are always welcome and encouraged.** The best way to learn is to ask questions and challenge what you are being taught. Feel free to talk to me after class or via email if you have any questions. I hope you enjoy my course!

**Disclaimer:** The content of this syllabus and/or course outline may change during this semester.

**EGR 432 Computer Interfacing PHYSICS CLASS SCHEDULE**

Professor Christopher Gabler

Rohr Science 209, 619-849-2356, cgabler@pointloma.edu

Office Hours: T 2:30 – 3:30, W 3:00-4:00, R 11:00-12:00 and by appointment

**LECTURE SCHEDULE (tentative)**

| DATE           | TOPICS  | Ch. Reading        | LAB                            |
