
Department of Physics and Engineering	
Instructor: Dr. Paul D. Schmelzenbach	Meeting: 10:00-12:00 MTWR (LA2) Lab 1:00-3:00 MTW (LA2)
e-mail: PaulSchmelzenbach@pointloma.edu	Office Phone: 849-2933
Office Hours: 12-1 MTWR, by appt.	Office Location: Temp Trailers

Materials – *Physics* by Douglas Giancoli, 7th edition, and a calculator

Description – A general introduction to physics including electricity and magnetism, optics, and modern physics. The course is taught primarily at the algebra/trigonometry level but does require limited use of calculus. Meets the professional requirements of life and medical science majors. Lecture and laboratory. Not repeatable. Letter grading.

Learning Outcomes – This course is one of the components of the General Education Program at Point Loma Nazarene University, in support of the general education learning outcome: Quantitative Reasoning: Students will be able to solve problems that are quantitative in nature. The purpose of general education is to provide a common educational experience, to develop essential skills, and to provide a broad cultural background for personal and professional growth. Within these broader outcomes, in this course you will

1. translate the description of physics problems into the mathematical equations required to solve them using relevant physical principles.
2. calculate solutions to physics problems once appropriate equations or techniques are identified.
3. predict reasonable answers in appropriate problems, and assess the reasonableness of calculated answers
4. explain the physical meaning of the parameters in introductory physics equations
5. create and interpret graphical representations of physical quantities (electric fields, ray diagrams etc.)
6. gather and interpret data in a lab setting

Class Meetings –

Before Class: In preparation for each class meeting there is a reading assignment. Because class meetings are not a standard lecture format, these reading assignments are very important. In addition summer session is quite compressed and it is imperative to come prepared to class. To complete the reading assignment you must answer three questions and submit them electronically by 8:00 a.m. the before class. Late submissions will not be accepted. This electronic communication is so important because it is your voice in what material we emphasize during class meetings and provides me constant feedback of your understanding of the material. These submissions will be graded on the following scale: 2=demonstrates reading, 1=room for improvement, 0=unsatisfactory. These points are accumulated and are worth 5% of the final grade.

Attendance: Some activities through this course occur only during class time and cannot be made-up. Let me know in advance if you must miss class. Attendance is one factor used in determining borderline grades. If absences become excessive, you will be required to meet with me and the situation will be dealt with on a case-by-case basis. In summer school remember missing a day is more like missing a week.

Lab – Lab meetings will provide you the opportunity for hands-on experience of topics from class meetings, improve lab technique, and data analysis. Labs will be preformed in small groups, but each individual is responsible for submitting his or her own results. Labs are worth 20% of your final grade. You must pass the lab portion of the class to pass the class.

Homework – Most days there will be homework due, homework is worth 15% of your final grade. Practicing working physics problems is critical to your success in the class. In summer school, you simply can't be behind so late homework will not be accepted for credit.

Exams – Three examinations will be given during the semester on June 18, June 26 and July 5. The final examination is on Thursday, July 12 at 10:00 am. Exams will be about half multiple-choice or short answer conceptual questions, and about half problems to solve. The final examination will be comprehensive. Exams will be closed book, but a sheet of formulas will be provided to you to use during your exam. Partial credit will be given for correct reasoning at any step of a problem, but only if it is communicated clearly enough for me to understand. For problems that call for a solution or explanation, no credit will be given for an answer alone; the method or reasoning must also be shown. Exams cannot be made up, unless under extreme circumstances discussed and arrangements made with the professor before the exam.

Final Grades – The grade you earn in this course is based on the scale shown to the right. The points you receive during the course are weighted accordingly:

- Preclass: 5%
- Homework/Activities: 15%
- Lab: 20%
- Tests (3): 35%
- Final Exam: 25%

A	100 - 91.0
A-	91.0 - 89.5
B+	89.5 - 87.5
B	87.5 - 81.0
B-	81.0 - 79.5
C+	79.5 - 77.5
C	77.5 - 71.0
C-	71.0 - 69.5
D+	69.5 - 67.5
D	67.0 - 61.0
D-	61.0 - 57.0

University Mission: As with all courses at PLNU, this course supports the cause to provide higher education in a vital Christian community where minds are engaged and challenged, character is modeled and formed, and service becomes an expression of faith. Being of Wesleyan heritage, we aspire to be a learning community where grace is foundational, truth is pursued, and holiness is a way of life.

Department Mission: Within this broader mission, the Physics and Engineering Department at PLNU provides strong programs of study in the fields of Physics and Engineering. Our students are well prepared for graduate studies and careers in scientific and engineering fields. We emphasize a collaborative learning environment which allows students to thrive academically, build personal confidence, and develop interpersonal skills. We provide a Christian environment for students to learn values and judgment, and pursue integration of modern scientific knowledge and Christian faith.

Attendance: Attendance is expected at each class session. In the event of an absence you are responsible for the material covered in class and the assignments given that day. Regular and punctual attendance at all classes is considered essential to optimum academic achievement. If the student is absent from more than 10 percent of class meetings, the faculty member can file a written report which may result in de-enrollment. If the absences exceed 20 percent, the student may be de-enrolled without notice until the university drop

date or, after that date, receive the appropriate grade for their work and participation. See <http://catalog.pointloma.edu/content.php?catoid=24&navoid=1581#Class Attendance> in the Undergraduate Academic Catalog.

Academic Honesty – Students should demonstrate academic honesty by doing original work and by giving appropriate credit to the ideas of others. Academic dishonesty is the act of presenting information, ideas, and/or concepts as one's own when in reality they are the results of another person's creativity and effort. A faculty member who believes a situation involving academic dishonesty has been detected may assign a failing grade for that assignment or examination, or, depending on the seriousness of the offense, for the course. Faculty should follow and students may appeal using the procedure in the university Catalog. See <http://catalog.pointloma.edu/content.php?catoid=24&navoid=1581#Academic Honesty> for definitions of kinds of academic dishonesty and for further policy information.

Academic Accommodations – If you have a diagnosed disability, please contact PLNU's Disability Resource Center (DRC) within the first two weeks of class to demonstrate need and to register for accommodation by phone at 619-849-2486 or by e-mail at DRC@pointloma.edu. See Disability Resource Center for additional information. For more details see the PLNU catalog. Students with learning disabilities who may need accommodations should discuss options with the instructor during the first two weeks of class. For more details see the PLNU catalog: <http://catalog.pointloma.edu/content.php?catoid=24&navoid=1581#Academic Accommodations>

Class Enrollment – It is the student's responsibility to maintain his/her class schedule. Should the need arise to drop this course (personal emergencies, poor performance, etc.), the student has the responsibility to follow through (provided the drop date meets the stated calendar deadline established by the university), not the instructor. Simply ceasing to attend this course or failing to follow through to arrange for a change of registration (drop/add) may easily result in a grade of F on the official transcript.

Credit Hour – In the interest of providing sufficient time to accomplish the stated course learning outcomes, this class meets the PLNU credit hour policy for an 4 unit class delivered over 5 weeks. Specific details about how the class meets the credit hour requirements can be provided upon request.

Final Exam – The final exam date and time is set by the university at the beginning of the semester and may not be changed by the instructor. This schedule can be found on the university website and in the course calendar. No requests for early examinations will be approved. Only in the case that a student is required to take three exams during the same day of finals week, is an instructor authorized to consider changing the exam date and time for that particular student.

Copyright Protected Materials – Point Loma Nazarene University, as a non-profit educational institution, is entitled by law to use materials protected by the US Copyright Act for classroom education. Any use of those materials outside the class may violate the law.

Course Calendar

Topics	Reading	Lab	
6/11	Charge and Electric Field	16-1 to 16-9	Lab 1: Electric Field
6/12	Electric Field and Potential	17-1 to 17-9	Lab 2: Charge Simulation
6/13	Potential and Current	18-1 to 18-7	Lab 3: Electric Potential Mapping
6/14	Circuits	19-1 to 19-7	
6/18	Lab 4: Circuits Lab		Exam 1
6/19	Magnetism	20-1 to 20-7	Lab 5: Slinky
6/20	Electromagnetic Induction	21-1 to 21-7	Lab 6: Motor
6/21	EM Waves and Optics	22-1 to 23-4	
6/25	Geometric Optics	23-4 to 23-8	Lab 7: Optics
6/26	Exam 2	24-1 to 24-4	Wave Optics lecture
6/27	Wave Optics	24-4 to 24-10	Lab 8: Wave optics
6/28	Optical Instruments	25-1 to 25-9	
7/2	Relativity	26-1 to 26-11	Lab 9: Relativity
7/3	Early Quantum Theory	27-1 to 27-13	Lab 10: Optical Instrumentation
7/4	Forth of July – No meeting		
7/5	Exam 3		
7/9	Quantum of Atoms	28-1 to 28-8	Lab 11: H Spectra
7/10	Nuclear I	30-1 to 30-11	Lab 12: Radioactivity
7/11	Nuclear II	31-1 to 31-5	Lab 13: Wrap-Up
7/12	Final Exam		Final Exam
